Professional Summary

Final-year Electrical Engineering student at SGSITS Indore with experience in Data Analytics, Machine Learning, Automation, and Full-Stack Development. Skilled in Python, SQL, Scikit-Learn, TensorFlow, PostgreSQL, BigQuery, REST APIs, and workflow automation. Developed machine learning models, recommendation systems, EEG-based deep learning solutions, and automation pipelines through internships and academic projects. Passionate about leveraging AI and data-driven technologies to build scalable solutions and solve real-world business problems.

Technical Skills

Languages: Python, SQL, C++, C, TypeScript, HTML, CSS

Machine Learning: Scikit-Learn, TensorFlow, Keras, XGBoost, Regression, Classification, Feature Engineering, Hyperparameter Tuning

Data Analytics: Pandas, NumPy, Seaborn, EDA, Statistical Analysis, Data Visualization

Tools: Git, GitHub, Zoho Flow, Frappe Framework, Vercel, Webhooks

Concepts: Machine Learning, Deep Learning, Recommendation Systems, ETL Pipelines, Workflow Automation

Experience

Data Analyst & Automation Intern

May 2025 – Jul 2025

Weaddo

Gurgaon, India

- Analyzed and transformed business datasets to generate actionable insights and support operational decision-making.
- Built Python-based automation workflows and API integrations, reducing manual effort and improving efficiency.
- Worked with PostgreSQL, BigQuery, Zoho Flow, and REST APIs to automate reporting and business processes.
- Developed ETL workflows for extracting, cleaning, and processing structured data from multiple sources.

Web Development Intern

Jun 2024 – Jul 2024

Apollo Health City

Hyderabad, India

- Improved website performance by optimizing JavaScript execution and image loading strategies, reducing page load time by 30%.
- Assisted in debugging, testing, and maintenance of production web applications.
- Collaborated with developers to improve user experience and website reliability.

Department Head – Student Feedback & Physics Mentor

Oct 2022 – Jun 2023

Clavictor Academy Pvt. Ltd.

Remote

- Led and supervised a student feedback team, ensuring timely collection, analysis, and reporting of academic performance data.
- Coordinated training and task allocation for team members, improving operational efficiency and communication workflows.
- Mentored JEE aspirants in Physics, simplifying complex concepts and supporting academic performance improvement.
- Developed leadership, stakeholder communication, and team management skills while handling cross-functional responsibilities.

Projects

Black Friday Sales Prediction

2025

Machine Learning Project

Python, Scikit-Learn, XGBoost

- Built an end-to-end machine learning pipeline to predict customer purchase amounts using retail transaction data.
- Performed exploratory data analysis, feature engineering, and model optimization.
- Implemented Random Forest and XGBoost models improving prediction performance by 20%.
- Generated actionable business insights using Pandas, NumPy, and Seaborn.

EEG-Based Emotion Recognition

2026

Deep Learning Project

Python, TensorFlow, Keras

- Developed an emotion recognition system using EEG brainwave signals and deep learning architectures.
- Extracted spectral features and classified emotional states using LSTM, DA-RNN, and xLSTM models.
- Applied signal processing and machine learning techniques for emotion prediction.

Book Recommender System

2025

Recommendation System

Python, Flask, Scikit-Learn

- Built a personalized recommendation engine using collaborative filtering techniques.
- Implemented cosine similarity and user-item interaction modeling.
- Developed a Flask-based interface for real-time recommendation generation.

Personal Portfolio Website

2026

Full Stack Project

Next.js, React, TypeScript

- Designed and developed a responsive portfolio website showcasing projects, internships, leadership, and achievements.
- Implemented SEO optimization, modern UI/UX principles, and scalable component architecture.
- Built using Next.js, Tailwind CSS, Framer Motion, and Shadcn/UI and deployed on Vercel.

Smart Geyser Protection System

May 2024 – Jun 2024

IoT Project

Arduino, ESP8266

- Designed an IoT-based protection system to prevent overheating, dry heating, and electrical hazards.
- Enabled remote monitoring and control through Wi-Fi integration.
- Integrated temperature sensing, water-level detection, and automatic cut-off mechanisms.

Education

Shri Govindram Seksaria Institute of Technology and Science (SGSITS)

Aug 2022 – May 2026

B.Tech in Electrical Engineering

Indore, India

St. Mary's Convent Sr. Sec. School

CBSE

Class XII: 84% Class X: 86.2%

Bhopal, India

Leadership & Responsibilities

- Sports Representative, SGSITS (2024 – Present)
- Team Captain – Swimming and Chess, SGSITS (2023 – Present)
- Content Head, NSS (2023 – Present)
- Campus Ambassador, IIT Indore Lakshya (2023 – 2025)

Achievements

- Nomura KakushIN 9.0 Semi-Finalist (2025)
- Nationals : Represented University at All India Inter-University Swimming Championship (2025)
- Gold Medalist – State Swimming Championship (2024, 2025)
- Silver Medalist – State Chess Championship (Rated 2081)
- Silver Medalist – Nodal Lawn Tennis Tournament
- NSS B Certificate Holder

Certifications

- Complete Python Bootcamp: From Beginner to Advanced – Udemy
- Full Stack Data Science and AI Program – Naresh i Technologies (Ongoing)
- Complete AI, Machine Learning and Data Science Bootcamp – Udemy (Ongoing)
